DJI Naza Programming for Spektrum DX8, DX6, DX9, DX10T & DX18/QQ & soon to be DX18T by freechip

http://www.rcgroups.com/forums/showthread.php?t=1789552

This thread is to provide programming, help and SPM files for these radios for use with the DJI Naza with GPS multirotor controller system.

Warning: This thread is moderated by myself and posts can be deleted at any time by myself. All I ask is that posts stay on topic and that is programming for these radios for the DJI Naza with GPS controller.

This Thread is NOT a DJI Naza with GPS thread and so question about specific DJI components or multirotors should be ask in their respective forum section and threads.

If you have Spektrum Airware radio programming questions for a DJI Naza w/GPS controller then by all means post away and I hope I can provided you with the answers that you need.
