### Williams Bros. Vintage-II Wheels. 3-1/8" Diameter, Antique Linen Hub, Black Tyre

Williams Bros. Vintage wheels are of the highest quality injection molded to give impressive detail and will grace any early aircraft. These are 3-1/8" in diameter. Sold per one pair.

The Williams Brothers Vintage-II wheels are injection molded, ABS wheel hubs with a rubber based tire. The 2-1/2" and larger are stuffed with a long lasting extruded foam rod for better support. Hubs are now molded in a realistic Linen color. Tire color is typically black, but some sizes have "white tyres" available, as the natural white rubber tire was commonly found up to the early 1920's.

These wheel designs are done to simulate a spoke wheel covered in doped fabric. Wheels up to 5" Diameter are of a semi-symmetrical style wheel (flatter backside, dome front), while the 5-1/4" and 6-5/8" simulate a symmetrical style wheel design.

All Dimensions are Approximate.
